

(Washington, D.C.) In case you missed it, Congressman Tim Ryan (OH-17) issued a statement on the floor of the House of Representatives today in defense of America's auto industry. Over the past week, various Republican Senators have begun suggesting that General Motors and other American car manufacturers should be forced into bankruptcy rather than receive any more federal aid. Almost 4% of America's Gross Domestic Product is auto-related and nearly one out of every 10 jobs, 13 million, is auto-related according to the Auto Alliance. ([The Auto Alliance](#))
